## CLAMF Contest Day on December 10th 2017.

The last contest for the year at the Frankston club had three racing events listed to take place but due to the lack of willing participants only the Classic FAI T/R took place. There were not enough bodies available to have the sufficient amount of timekeepers/officials on hand for three up races so we settled for two ups instead. All races ran smoothly except for the last one. Andrew Nugent was pitting the model for Harry Bailey and it was circulating quite nicely but on the second pit stop the model was re-started and released by Andrew but the outboard wing clipped Andrews knee and the model ran into the circle and ended their race. No damage was done to the model but Andrew was embarrassed.

Results:-

### Heat 1

Bailey/Hunting 4:21.34  
 Nugent/Ellins 4:16.88

### Heat 2

Wilson/Lacey 4:58.38  
 Nugent/Ellins 4:20.22

### Heat 3

Bailey/Nugent DNF  
 Wilson/Lacey 4:41.38

*Mark Ellins is seen here pitting Andrew Nugent's Classic FAI model.*

After the competition ended we all headed off to the Wilsons home and had the clubs Christmas break up party which was catered for by Fiona and family.  
 Thanks Fiona, it was most enjoyable.

## F2B Contest held by the Doonside Club at Whalan Reserve on Sunday 3rd December.

Report and Pictures by Warren Williams.

Once again our weather man provided heavy wind gusts with instant directional changes. This made very unstable and difficult flying conditions with some flyers electing not to fly, others not able to finish their pattern (DNF) for safety reasons.

*Pit area, note the two beautiful Yatsenko electric powered Gee Bee's.*

*Frank Battam with his Gee Bee.*

*Overall winner in expert was Murray Howell seen here with his Gee Bee.*

**Left:-**

*Picture of the two perpetual Trophies (originally donated by Brian Eather) given for the competitor who gains the most points from flying and competing in as many competitions as possible throughout the year.*

*The one on the left went to Geoff Van Campen. The one on the right went to Reg Towell.*

*Right:-*

*Warren Williams' model in the workshop undergoing repairs, after the wind took control of an overhead eight in round 2, demonstrating the ground always wins if you do silly things. However, due to some DNF flights plus almost 2 complete flights and a big bonus with handicap points Warren took out first place in this division.*

## **KMFC Christmas Party on Sunday 26th November at the St Ives Showground.**

There was a good gathering of club members in attendance as well as the demon WIND.

Consequently, most models stayed in their vehicles. Whilst some made it to the pit area only one or two actually flew.

With a wonderful barbeque and lots of delicious food on offer, (many thanks to Jeff and Jenny Reeves) everyone was quite content to have a lazy day, enjoy the food and of course, the great conversations.

*The pit area on the party day.*

*Story and pictures from Warren Williams.*

A working bee at the Frankston field had a gang of willing hands at work doing some much needed repairs to some serious cracks in the aging concrete circle. The result was a great improvement and we shall wait and see if the end result stands the test of time.

I was puzzled why my genuine Oliver Tiger could not manage to get as low as the permitted 27 for ten at the recent NSW State Championships in Albury. I worked out the reason why.

My old Olly diesel 27 Goodyear now easily achieves 24.6 sec for ten laps.

I did not change anything except the lines. I made up a new set from lightweight Laystrate and gained about 5 sec for ten laps over the 20 thou heavyweight Laystrate lines that I used at Albury.

What inspired me was an article in a book that I recently became re-acquainted with (I had a copy when I was 14 years old); Control Line Manual, Ron Moulton, 1963 edition.

Anyway, here are the graphs, I suspect that they are still pretty valid.

Now I just have to learn how to prime better and flick harder!

Regards \* Danny \*

Hi,

Just thought you might be interested to know that we have set up a few distributors in Victoria. You can now purchase our products from distributors in Brooklyn, Campbellfield, Clayton, Dandenong, Hallam, Reservoir and Somerfield. The full contact details for these distributors is in the web site link in this email below our address.

If you like to deal with local suppliers, we encourage you to talk with these distributors and let them know what types of products you will require.

Have a great Christmas, we look forward to continuing to serve you in 2018 whether directly through the online store or through our Victorian distributors.

Regards

Robert

## New Models

Here are some pictures of a recently completed Classic FAI T/R model built by Harry Bailey.

Model details.

Based on the Klotznorutski plan with a Nelson RIRE engine. Wing and tailplane made by Rob Fitzgerald, engine mount from Andrew Nugent. Set up with a 7cc tank and a 3.4mm venturi the model fly's well and the engine has good re-starts and produces a competitive race speed.

## Wights Model Aircraft

Models built by John Jamieson.

### STUNT NEWS

Stunt specialist, Tom Dixon in the USA, has announced interesting expansions to his ranges:

A choice of 7 quick-build profile stunt kits which include sheeted foam wings and ready cut parts. Both classic and contemporary designs are included. To suite engines from .40 to .54. No hardware. \$US150 plus shipping.

Stalker 51 side exhaust motor to suit large profile ships and classics where a typical Stalker rear exhaust simply wont fit. No price yet.

Write to: Tom Dixon, Controline Sales, 315 Santa Anita Ave, Woodstock, GA 30189, USA

I can now produce wings and tailplanes that are shaped on a Computer Numerically Controlled (CNC) router and can be any planform and shaped with any section although I have my favourites. The finish and accuracy of these products has to be seen to be believed.

They have laminated leading edge and reinforced front panel on the outboard wing for catching.

Internal control grooves and bellcrank assembly are also part of the package. They are ready for glassing as supplied. A shut-off actuator can be supplied as part of bellcrank assembly if required.

I can also supply spruce for leading/trailing edge etc. cut to any section size.

I can be contacted via Facebook or
